Met Office Aberdeen Meteorologist's View
Significant wind chill effect at height.

Forecast for Sunday 16 Jan 2022
Weather: Rain and snow band across area at first overnight, clearing before dawn. Mix of bright spells and scattered mostly light showers through the day, with snow level 500m in showers lifting to 900m late in day.

Maximum wind: West 20mph with gusts 35mph across most exposed ridges and summits.

Chance of cloud free mountain/hill tops above 800m: By day 75% for any given time, but limited chance for extended clear spells given the showery nature of the flow.

Visibility: By day generally good or very good, becoming moderate or poor in rain showers, very poor in snow showers, only a few metres in cloud with bases sporadically lowering 500m as showers push through.

Temperature: **Glens:** Plus 1 Celsius increasing 7 Celsius during the afternoon
At 800m: Plus 2 Celsius lowering Minus 3 Celsius for a time
Freezing level: 1000m lowering 600m for a time
